

1. Log in as user root. In the home directory of root, create one archive file that contains the contents of the /home and the /etc directory. Use the name **/root/essentials.tar** for the archive file.
2. Rename the file **/root /essentials.tar** to **/root /archive.tar**.
3. Create a symbolic link in the home directory of the user root that refers to **/root /archive.tar**. Use the name **link.tar** for the symbolic link.
4. Remove the file **/root /archive.tar** and see what happened to the symbolic link.
Remove the symbolic link also.
5. Compress the **/root/essentials.tar** file with password to be "password123".
