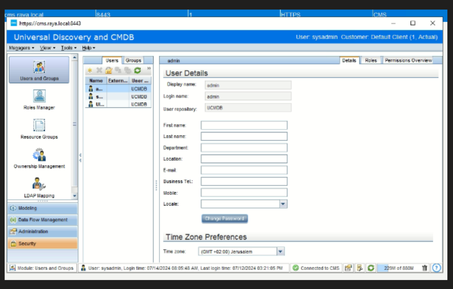
uCMDB OBM integration

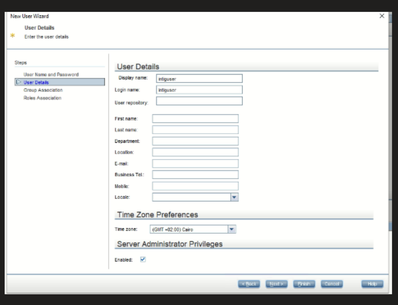
Sunday, July 14, 2024 6:18 AM

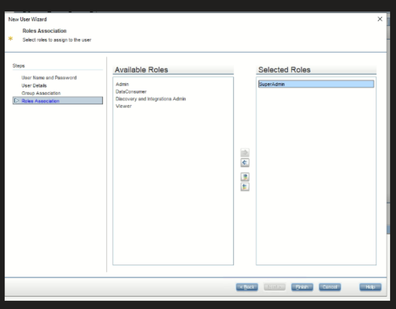
Step 1 Create the integration user

- Go to ucmdb



- Create new user
- Add user properties



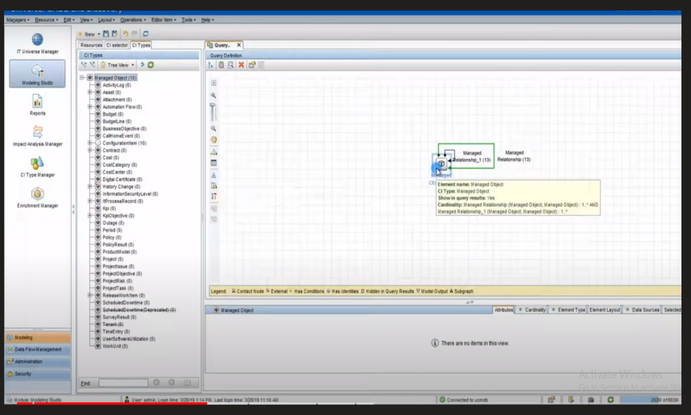


Step 2 Install the UCMDB Data Flow Probe --(Not mandatory for POC)

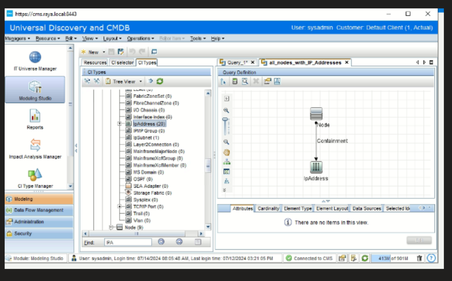
From <https://docs.microfocus.com/doc/Operations_Bridge_Manager/2023.05/IntegrateUCMDB>

Step 3 Create Query

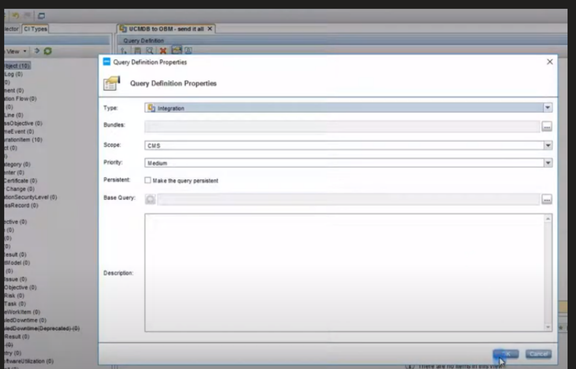
1. Create Query
   - Got ucmdb -> modeling ->Modeling studio -> create new Query

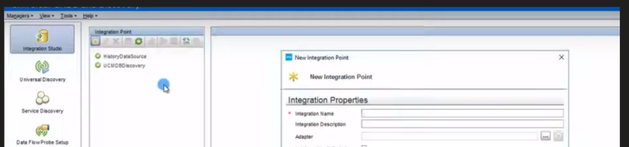


- You can define any different Query such as all Nodes or all nodes with IP Addresses



- Save the Query in the Customer folder
- Important to ensure that this created Query is in integration type from Query Definition properties



Step 4 Create New Integration point


- Go to ucmdb -> Data flow management -> Integration studio ->create new integration point
